

# Classroom Jobs

Giving every student a weekly job is an important part of classroom management routine.

it gives every student responsibility over the classroom, ownership in the classroom. and helps the teacher out too!

The students are assigned different roles throughout the week/ school year. Each week a group of students are assigned a job and the rest are "on vacation." These group of students will keep these jobs for the entire week and then switch jobs on Monday.

Those students who did not have a job last week or who were "on vacation" will then get a turn.
